Simple installation with **Zoltrix “flash-ME-xchange” USB Memory Card Reader**

Thank you for choosing Zoltrix “*flash-ME-xchange*” USB Memory Card Reader! It is an external memory card reader that bridges the gap between your computer and your valuable digital devices (digital cameras, handheld computers, PDAs, MP3 players...etc). Supporting 4 major memory cards (Compact Flash Type I & II, IBM Microdrive, Smart Media, MMC, and SD), its provides simultaneous file transfer from one card to another. The USB interface enables easy installations no matter you are using notebook or desktop computers. The computer will instantly recognize the cards as physical drives allowing quick and easy data transfer.

Drivers Installation

Make sure you are running Windows® 98 / 98SE, Windows® ME, or Windows® 2000.

- 1. Connect the flash-ME-xchange directly to the PC motherboard or self powered USB HUB by using bundled USB cable when the PC is on and Windows® is loaded.**

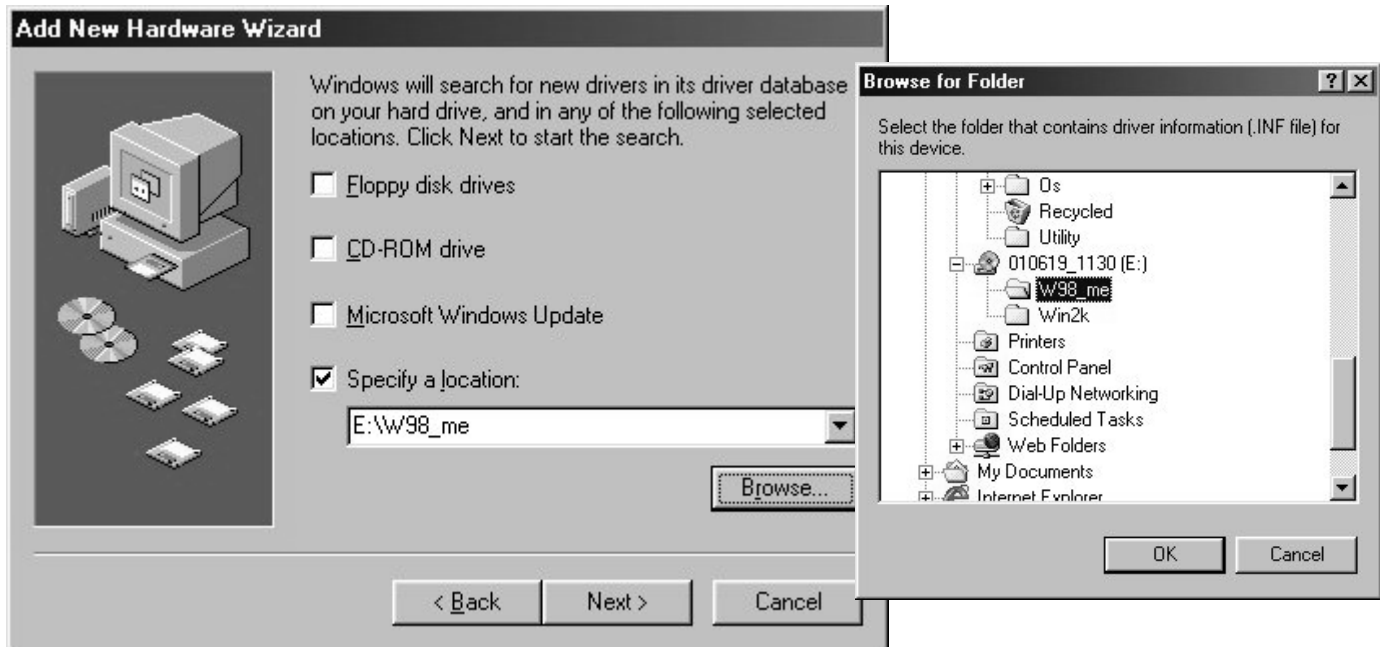

2. The following screen will appear and press “Next” to proceed.

3. Select “Search for the best driver for your device” and press “Next”.

4. When Windows® prompts for drivers' location, select "Specify a location", and press "Browse" to locate the driver folder W98_me for Window® 98 / 98SE / ME or folder Win2k for Window® 2000. (Please ensures to have driver CD loaded in CD-ROM at this time.) Press "OK" and press "Next" to proceed.

5. Drivers should now be found and press "Next" to install.

6. Press “Finish” to complete the driver installation process.

7. Drivers are now installed.

8. When browsing My Computer, your PC would be added 3 more “Removable Disk” (only the flash-ME-xchange is connected). CF Type I & II / IBM Microdrive drive, SM drive, and MMC / SD drive are placed in order from 1st to 3rd Removable Disk respectively.

NOTE: Please do not remove the memory cards (CF Type I & II, IBM Microdrive, SM, MMC and SD) when writing/reading is active (Green LED is flashing).
